

I listen to XM satellite radio. Radio reception in West Texas is poor. Satellite is the only way to get decent reception, in the house or the car! I oppose any measure that limits satellite radio in any way. I pay for it, and I want full service.

Broadcast radio doesn't need any more protection.

I depend on satellite service. There is no major radio reception here. Please do not limit satellite service.

Thanks you

Marcia Odal, M.D.
